

Lab #8: Data Collection

Purpose:

All teams will be running their research projects in class this day. Each student in the class will be a participant in other team's research projects. The entire class time will be spent completing the research study materials.

Your team task:

- There is no team task for this Lab. Each student will complete a package of research materials individually.

General Guidelines:

- When you have completed your research package material as an individual participant, hand your completed package in to your professor or graduate co-instructor.
- Remember that you are participating in scientific research that is being conducted by your classmates. Please read the materials carefully. Your conscientious participation is important and vital to your classmate's research projects, just as your classmate's conscientious participation is important and vital to your team's research project.

Documents to refer to / Template to use:

You will be provided with your participant package which will be a compilation of other team's research project's materials.

At the end of class:

- Hand in your completed package to your professor or undergraduate co-instructor.

After class:

- Your professor and graduate co-instructors will de-compile the completed participant packages and compile each team's completed participant sheets from the class.
- Your completed participant sheets will be returned to you in the Lab 9 class so that you can enter your research study data, and then analyze and interpret your results in Lab 9.
