LAB_01: Thursday, September 12 Rough Project Idea

(Refer to the Lab Guide – Research Manual: Lab #1 and to the Lab Guide – LAB Assignment Examples.)

TEAM #:
Members Present:
Members Not Present:
 Below, state a conceptual research question (if you have extra time or can't decide, state up to 2):
Next, try and translate your conceptual research question(s) into testable research question(s):

3. Now, considering your testable research questions, what is the independent variable?

4.	How will the independent variable be manipulated?
5.	What are the levels/conditions of the independent variable?
6.	Next, what is your conceptual dependent variable – that is, the outcome of your study?
7.	What are your operationalized dependent variables? Try to type an actual question with responses scale in the space below.
