

# About the University and the School of Management

#### **About the University and the School of Management**

Università Bocconi, founded in 1902, was the first Italian university to grant a degree in economics. For over a century, Bocconi has played a leading role in Italy's social and economic modernization. It has remained true to its founding values of being a major research university, with democratic values and open to the world, as well as financially and politically independent. Università Bocconi believes that excellence can only be based on a person's academic profile as well as on his or her values and cultural and ethical background. This is why the University offers numerous activities, special occasions for people to enrich their knowledge.

Since 1971, **SDA Bocconi School of Management** has been engaged in the training of executives with an international approach. The vision of empowering talent to meet the future is present throughout the School's offerings, from executive and custom programs to MBA and Masters. The goal is the development of individuals, companies, institutions and economic systems through the creation of value and knowledge.

# Milano and New Campus

Location: Studying in the heart of Milano means the best mix of culture, leisure, people and places. Milano will be your campus - a city at the center of European and Italian business, finance and industry with a great potential for contacts and careers. Milano and SDA are the center of Italian Excellence and from Milano you can easily reach the most beautiful natural and artistic locations in Italy. Want a taste? Click here!

The New Campus: the Campus is an urban space is an avant-garde architecture from the Japanese Kazuyo Sejima + Ryue Nishizawa and their studio SANAA. One tower, four buildings, a sports center, and a large park. A Nearly Zero Energy Building, an example of urban settlement with high environmental sustainability. All buildings are designed to ensure ideal penetration of sunlight and to optimize natural ventilation, minimizing the use of artificial lighting and reducing energy consumption. Furthermore, there is also a system to collect and reuse rainwater.
