Software Developer (Web and Mobile)

Job Type
Paid (Full-time) (30 hrs/wk or more)

Desired Skills

ProgrammingSoftware

Job Description

At Ensemble, we build innovative custom software solutions for some of the largest brands in the media and entertainment, financial services, insurance, government, life sciences, and manufacturing industries. We're proud of what we do, and we know that our incredible team is the secret to our success.

Ensemble is currently looking for versatile Software Developers who are interested in leveraging the latest tech stacks to build industry-leading software solutions. We work on projects of all types, including website development, mobile apps, and apps for connected devices involving the newest technologies on the market.

Do you have what it takes to join our team?
- A solid understanding of software engineering practices and principles
- Flexibility and adaptability to learn new languages quickly
- Excellent communication and time management skills
- A desire to succeed, paired with a winning attitude and unparalleled work ethic
- Experience with web development technologies (JavaScript, HTML, CSS)
- Experience with object-oriented languages (preferably, Java)

In addition to the above requirements, experience in any of the following areas would provide a definite advantage:
Web Development:
- JavaScript frameworks (e.g. React, Redux, Vue, Angular, Knockout), object oriented and functional JavaScript concepts
- Java (e.g. Sling, Spring) or JavaScript (NodeJS Express) back-end frameworks

Mobile Applications:
- Native development for iOS (Swift or Objective-C) or Android (Kotlin or Java)
- Cross-platform mobile application frameworks (React Native)

Media Applications:
- Development for smart TVs or connected devices such as Roku, Fire TV, Android TV, tvOS, Tizen, LG, Vizio, Xbox One, PS4

Regardless of what programming language you specialize in, you can expect to further develop your existing skills in many areas, including development for both web and mobile applications.

Ensemble has a team of over 75 developers and strongly encourages knowledge sharing. So, if you have a strong overall foundation in software programming, but are light in a few areas, we encourage you to still apply.

Life at Ensemble:
We support a healthy work/life balance for our employees. And we know that's easier said than done, so in addition to a comprehensive benefit plan we also offer:
- Monthly staff lunches & snack days,
- Lunch & Learns,
- Gaming and movie nights,
- Fitness center and in-office yoga classes,
- Basketball, badminton, and ping pong,
- Summer family barbecue,
- Free parking on-site
- Free shuttle from Bridgeport Station

A bit more about us:
Since 1995, Ensemble has been providing custom technology solutions to our customers, with the goal of helping them deliver incredible digital experiences. We have built such strong relationships with our customers over the years that the majority of our business now comes from repeat business and referrals — and we couldn't be happier about that.

With offices in Europe and North America, Ensemble operates on a global scale providing solutions and support to some of the largest brands around the world.

If you are interested in joining our team, please apply today!

Subject: Software Developer Job Application

To whom it may concern,

Please consider my application to the Software Developer (Web and Mobile) job as advertised in the UBC Careers online website. I am currently in the process of completing a Bachelor of Computer Science (BCS) degree at UBC and I am excited to start applying my skills in web and app development with Ensemble Systems.

I come from a background in marketing and communications for nonprofits, where I taught myself the basics of front-end web development using HTML, CSS and basic Javascript. This early exposure to the world of coding made me interested in learning more and potentially pursuing a career in the field. After doing a brief front-end web development bootcamp at the RED Academy in Vancouver, I decided to make the full jump into the tech world by joining the BCS program at UBC.

I am hoping to combine my previous experience in marketing and communications with my new programming skills to create user-friendly and accessible web and mobile applications. I am proficient in the use of both front-end and back-end technologies like Javascript, HTML/CSS, Java, Python, and SQL.

Using my communications background and my new coding skills, I have built a series of personal projects, including a specialized feeding mobile app for children with organic acidemias or a web app to connect homeless people to shelters. All of my projects can be found in my Github page at https://github.com/jorosafi.

I would love to have the opportunity to share more about how my skills and experience meets your needs over an interview. I can be contacted by phone (778-123-1234) or email at email@gmail.com.

I look forward to hearing back from you.

Sincerely,
Rodrigo Samayoa

Subject: Job Reference

Dear Jamie,

I hope you are doing well.

As you know, I am in the process of completing a program in computer science at UBC, which means I am starting to apply to full time jobs in the field.

Given our previous working relationship, I wanted to ask if I can put you down as one of my references in the job application. My work as a digital campaigner at Leadnow is relevant to the work I am hoping to do in tech. Rather than work on the content side, I now want to work on the tech side. A reference from you would go a long way helping me get my dream job.

I would be happy to speak over the phone if you would like to know more about the skills I have gained since we last worked together and about my future career plans.

Please send my regards to Reilly and the children.

All the best,
Rodrigo Samayoa

Subject: Job Reference

Dear Aaron,

It feels like yesterday that I asked you for a reference to enter the BCS program at UBC. But I am now in the process of finishing my program and have begun looking for and applying for jobs.

I wanted to ask if I could put you down as a reference for these jobs. My experience as a digital campaigner at the BCGEU is relevant to the work I am hoping to get into, which is why I am reaching out to you.

Please let me know if you would like to speak about the skills I have gained in school and what my future career plans are. I am happy to chat on the phone or send you more information over email anytime.

All the best,
Rodrigo Samayoa

Dr. Gregor Kiczales
CPSC110 Professor
University of British Columbia
ICICS/CS Building 201-2366 Main Mall
Vancouver, BC Canada V6T 1Z4

Subject: Job Reference

Dear Dr. Kiczales,

First of all, thank you for the work you put into teaching us systematic program design this year. This class really helped me build a solid base for my further trajectory in the computer science department and I still find myself applying design recipes even for the most simple of programs.

Now that I am approaching the end of the BCS program, I have begun the job search, which is why I am writing to you. I was wondering if you would be ok with me listing you as one of my references.

My participation and performance in your class speaks volumes to everything I have learned in school and dedication I have to computer science. I hope you had the same impression.

A reference from you would go a long way in helping me find my dream job as a software developer and would give you the opportunity of supporting a budding developer jumping into the field of computer science.

I would be happy to talk more about the skills I learned in school and how I plan on applying them in my future career.

All the best,

Rodrigo Samayoa
