Riipen

UBC SAUDER SCHOOL OF BUSINESS

WHAT IS RIIPEN:

Riipen is a collaboration platform for experiential learning between post-secondary institutions, educators, industry partners and students. The platform allows all parties in its ecosystem to co-create, manage, assess and report on meaningful experiential learning opportunities efficiently and effectively.

> "Riipen helps my students develop real-world experience because they are working with real problems that industry partners have brought to the table. What the students get the opportunity to do is take the theories they develop in the course, and figure out which ones apply and how to apply them to the particular problem."
>
> **Tom Culham, Sauder School of Business at UBC**

THE PROCESS

Easy course design tools with **fully guided set-up.** Create your work-integrated learning (WIL) profile.

Invite industry partners or search for them in our marketplace. **Riipen will assist in the matchmaking process.** Meet with potential partners to scope project outcomes.

Efficiently manage your work-integrated learning experiences through group chats, project milestones, and **support from a dedicated Riipen team member.**

Riipen makes it easy to provide feedback, receive deliverables, and report on courses/projects.

SAMPLE SAUDER COURSES:

- B2C Strategic Marketing Plan - Jenny Dickson

- Marketing Outreach Consultancy - David Hardisty

- IT Consultancy - Arslan Aziz
