Languages

Machine (Artificial)
- Must be 100% accurate
- Will fail to function if errors are present
- Created by humans for specific purpose

Source: https://medium.com/@anaharris/human-languages-vs-programming-languages-c89410f13252

Human (Natural)
- Errors
- Inconsistent rules
- Can be used in causual or profession setting
- Created overtime and is constantly changing
