Reid Holmes
Associate Professor
CS 310 UBC

Dear Mr. Holmes,

I am writing to ask whether it would be possible for you to provide a reference for me. Your class was very insightful with regards to Agile development and I learned how to work within a Scrum team.

I was a student in your 2019-2020 Winter1 CS310 Session. My student id is 35169151. My ugrad id is w7h0b. I was in the evening lecture. I earned high scores (> 90%) for the deliverables. I interacted heavily with the TAs for the course and attended most of the Labs, even if they were not my own labs.

I am currently in the process of seeking employment as a Software Engineer at MasterCard. I am interested in understanding how technology can help innovate Customer Relationship Management systems. I am also interested in the overlap between sales, marketing and technology. I would appreciate a positive reference from you. This will enhance my prospects of achieving my career goals. I need to have my references ready by September 30th.

Please let me know if there is any information that I can provide with regard to my experience. I've attached a resume. I can be reached by email at siddhero97@gmail.com.

Thank you for your consideration.

Sincerely,

Siddhartha

Natalie Chen
President
Computer Science Student Society, UBC

Dear Natalie,

I am writing to ask whether it would be possible for you to provide a reference for me.

I am writing to ask whether it would be possible for you to provide a reference for me. I have gained a lot of experience with regards to management from our team.

I was an officer for the 2019-2020 Winter 1 and Winter 2 Session. As an officer, I frequently helped with cleaning up the cube and co-hosting the Photo Taking Event.

I am currently in the process of seeking employment as a Software EngineerMasterCard. I would appreciate a positive reference from you. I am interested in the intersections of; marketing, sales, and technology. This will enhance my prospects of achieving my career goals. I need to have my references ready by September 30th.

Please let me know if there is any information that I can provide with regard to my experience. I've attached a resume. I can be reached by email at siddhero97@gmail.com.

Thank you for your consideration.

Sincerely,

Siddhartha

Jonatan Schroeder
Assistant Professor
CS210, UBC

Dear Jonathan,

I am writing to ask whether it would be possible for you to provide a reference for me. I am writing to ask whether it would be possible for you to provide a reference for me. Your class was very insightful with regards to Software Engineering and UML Diagrams and I learned how to develop efficient programs in Java.

I was a student in your 2016-2017 Winter1 CS210 Session. My student id is 35169151. My ugrad id is w7h0b. I was in the evening lecture. I earned high scores (> 90%) for the labs and the final. I interacted heavily with the TAs for the course and attended most of the Labs, even if they were not my own labs.

I am currently in the process of seeking employment as a Software Engineer at MasterCard. I would appreciate a positive reference from you. I'm interested in seeing how technology can be used to develop good Customer Relationship Management systems and how marketing, sales, and technology can all fit together. This will enhance my prospects of achieving my career goals. I need to have my references ready by September 30th.

Please let me know if there is any information that I can provide with regard to my experience. I've attached a resume. I can be reached by email at siddhero97@gmail.com.

Thank you for your consideration.

Sincerely,

Siddhartha
