

# The Wealth (and Population) of Nations

**GDP per Capita** is a nation's total Gross Domestic Product (in US dollars) divided by its total population to provide GDP amount per person, presented as five colour classes.

**Total GDP** (in trillions of US dollars) is represented with the green bar and ranges from under one million for three nations to \$15.09 trillion for the US (shown in legend).

**Total POPULATION** in billions is depicted with the orange bar and ranges from less than 1.000 for five nations to 1.34 billion people in China (shown in legend).
