

You can help make [community] a better place for families with young children!

We are working together with many organizations across [community] and together with UBC to understand what families with young children in our community need. One of the ways we are doing this is by asking parents of toddlers in our community (12-24 months old) to complete a short survey (15 min). After you complete the survey, you may enter to win a \$50 gift card. All information is strictly private and is only used as group-level information (that is, we combine the surveys from all families in our community). It is important that as many families with toddlers fill out the survey as possible so that we have a real picture of the experiences of families with young children in our community. You can complete the survey here (online or paper). Thank you for your help!
