

**September 24 – November 12, 2014**

"Teaching in a Blended Learning Environment (T-BLE) is a short blended course designed in support of UBC's strategic goals related to educational transformation and flexible learning. Aimed at instructors, T-BLE will give you a great start in navigating the blended learning environment, working within a cohort of your peers. As part of your T-BLE activities, you will redesign a module of your own course in a blended format by incorporating more active learning and evidence-based strategies."

- Dr. Simon Bates, Senior Advisor, Teaching and Learning and Academic Director, Centre for Teaching, Learning and Technology (CTLT)

## Are you thinking of blending your course?

### Join us in Teaching in a Blended Learning Environment (T-BLE)

T-BLE is a short, immersive blended course aimed at instructors who are already teaching in the classroom and are considering moving to a blended environment. The pilot offering of this short course will run for 6 weeks this fall (Sept 24 - Nov 12) and will be delivered in a blended format - a combination of online and face-to-face sessions.

#### What's in it for me?

- An orientation to flexible learning and its potential impact on your practice
- An opportunity to redesign a module from a current course for a blended learning environment with support and input from your colleagues and course facilitators
- A chance to collaborate with and learn from others in different disciplines
- An opportunity to gain an authentic experience with the blended learning environment

#### If you are interested in joining the T-BLE faculty cohort...

Please contact kele.fleming@ubc.ca), Associate Director, Teaching & Learning Professional Development (CTLT) by September 15, 2014.
