

Why are you taking this course?

I am taking this course because of two reasons. The first one is because I like to understand how the physical things around us work. The second reason is I don't like programming.

What do you want to take home from this class?

I want to at least understand how the nature around us is formed and work.

I would like to see bigger pictures from little things,
which exactly what we do here.

Anything. As much as possible.

1. Why are you taking this course?

I find it really interesting to know about how earth is formed and ~~what~~ I want to know ~~is~~ ~~actually~~ what is actually happening for example when a volcano erupts and all that stuff.

I want to learn more about the place I live.

2. What do you want to take home from this class?

Hopefully enough knowledge to explain the others all this interesting facts about the earth.

1. I chose EOS because I like prefer natural science compared to CPSC. I am curious about this nature.

2. I want to know about how ocean formed and contributed to life form.
