### Diversity and sustainability of ecosystems

**VR 360° exploration:** The Fight to Save Threatened Species (360 Video)

[https://www.youtube.com/watch?v=T-aOVE22IEw&list=PL7drbpqwVT6r4zC1hqDSVnU2\\_qeD0bvSH](https://www.youtube.com/watch?v=T-aOVE22IEw&list=PL7drbpqwVT6r4zC1hqDSVnU2_qeD0bvSH)

#### General Introduction:

Doing a VR 360° exploration/expedition is like going on a vacation or trip. You have to plan e.g. your destinations, places to eat, relax, and meet friends and family. It means identifying your objectives.

#### For teachers:

In this section, you will see a modified planning and preparation arranged into three (3) steps. As a teacher, these steps help you maximize the learning opportunities a VR 360° exploration/expedition can potentially offer.

Three steps:

- 1) Pre-exploration: Preview the playlist exploration yourself. By doing this, you are identifying possible questions and activities that might enrich students' VR experience.
- 2) During exploration: Provide guide or key questions or ask the students to formulate new questions about the playlist and encourage students to refer to other resources (e.g., YouTube videos, articles, etc.) to connect and enrich the playlist.
- 3) Post-exploration: Follow-up on the new questions and wonders students have identified. These questions might lead to an interdisciplinary inquiry project, blog posts or short video clips to link with the original unit or chapter coverage.

**Description:**

In this 15-minute exploration activity, you'll see a 360° panorama of the most endangered and extraordinary creatures on the planet!

“Get closer than ever before to the most extraordinary creatures on the planet...before they disappear. Whale sharks, rhinos, elephants, manta rays and lions are all threatened with extinction.” Discovery VR  
Published on Oct 9, 2015

**Objective:**

The core learning outcome of this playlist is to enrich students' understanding and empathy on the threatening circumstances of marine and land species from poachers, illegal international wildlife trade.

However, unlike a regular 2D video, this VR provides a 360° panorama, which allows your students to focus on different points of interest that might vary from student to student. So, take time to explore the playlist using different angles and positions.

**Suggested Guide:**

**1) Pre-exploration:**

Wildlife conservation: Why it matters

<https://www.worldwildlife.org/initiatives/wildlife-conservation>

**2) During exploration:**

What key questions could pique students' interest as they watch this playlist?

As well, ask them to think of interesting questions they want to answer as they watch the playlist. Let them discuss these questions and their possible answers.

They can do this by groups of two or three.

With limited number of Google cardboards, let students work in pairs. Let them take turn to watch the playlist and do a Q & A. For example, Student 1 will describe to student 2 what he/she is seeing right now. Student 2 will explain the playlist, to Student 1 and each student will take turns doing Q & A.

**3) Post-exploration:**

Give time for the pair/class to think about the questions and answers they have generated after watching the playlist.

Let them recall experiences that might relate to the playlist e.g. early preparation and research before hiking on mountain ranges or active volcano or the hazards/effects of volcanic ash on aircraft.

Then invite them to read the link below. With the playlist, let them express their understanding, reactions into any interdisciplinary inquiry projects, blog posts, short video clips, etc.
