Johnson Wong
SMART Technologies, Test Developer
3636 Research Rd NW
Calgary, AB T2L 1Y1

Dear Johnson Wong,

I hope all is well! I am applying for a Java Developer co-op position and, if you have time, I believe a recommendation from you would greatly help my application prospects.

This position is with Elastic Path, a Vancouver-based ecommerce software company that focuses on innovative tech solutions, analytical thinking, and community perspectives. As a computer scientist and mentor familiar with my work, I feel your insights on my problem-solving, teamwork, and learning abilities are especially relevant in this realm.

Specifically, Elastic Path looks for developers who are:
- Adept in communication and version control systems
- Experienced solving complex object-oriented problems
- Passionate about learning and fearless in trying new solutions

Incorporating my fulfillment of these aspects into the reference letter will help strengthen my case. Moreover, I believe elaborating on my contributions to the SMART development team, notably my automated test and scripting additions, will greatly assist by demonstrating my work ethic and programming abilities

I plan to include the reference letter in my application package, so please send the letter to me directly at wes.berry1@gmail.com. For your reference, I need to submit the application by April 15, 2016. Relatedly, here is a link to my LinkedIn profile for easy perusal of my experiences, interests, and trajectory. Please do not hesitate to contact me with any questions!

Thank you very much and I feel that our experiences working together will hugely benefit my success in this position! Your perspectives and experiences will strongly contribute to my application and I sincerely appreciate you taking the time to provide a reference!

All the best,

Wesley Berry
